

WHAT PEOPLE ARE SAYING ABOUT MX

MX enables banks and credit unions to thrive in the digital age, and people from a range of companies are taking note. Here are some of the testimonials we've received.

“ MX shares our vision and have proven that they will continually push innovation in this space. The MX API enables our customers to get faster access to aggregated account data. ”

Brett King, founder and CEO of Moven

“ I use MX's personal financial management software myself. I've tried others in the past and have never stuck with it. The key for me is that I can go in there and in a few minutes see what my finances look like. I don't have to re-categorize anything myself, I don't have to dig into complex charts. I can see it right away. ”

Caroline Philpott, Sr. Director, Product Development at Visa Inc.

“ We looked at everybody in the industry, we looked at all the different aggregators directly, we looked at all the different providers, and we were blown away by what MX had to offer. ”

John Schulte, CIO of Mercantile Bank

“ MX, in terms of user experience, user interface, product vision, product strategy had a much more compelling vision and execution path [than the competition]. That's a decision we made three or four years ago, and we've been very happy ever since. ”

Grant Parry, CEO of Connect FSS

“ MX exceeded our expectations ... We were very pleased with the timeframe, with what was required, and with how everyone worked so closely together ... I can't speak highly enough about it. ”

Sherrie Krizic, SVP Financial Planning at LGFCU, on the integration process

“ MX is at a whole different level with technology, marketing, creativity, and ingenuity. ”

Randy Wardwell, President, FPS Gold
